

Quick-Start Guide

With the vegan Adore Strip Wax Roll-ons, you can remove hair from 2 mm length on large body areas very quickly, effortlessly and economically. For optimal results, follow the PINK 2 mm Waxing Technique as described below. This Quick-Start Guide will provide you with the most important basics for using Adore Strip Wax. You can find related video content at www.youtube.com/PINKCosmetics.

Whatever option you choose, we are always by your side to support you every step of the way. To share tips and tricks with the PINK Waxing Experts join our English speaking Facebook group 'Depiladora's Secrets' or the Dutch speaking group 'Depiladora's Secrets Nederland'.

1 PLACE ROLL-ONS IN HEATER

- ❖ Heat the Adore Strip Wax Roll-ons in a cartridge heater.
- ❖ The setting for the Triple Roll-on Heater is as follows: 20 minutes / level 6

2 CHECK CONSISTENCY

- ❖ At the correct temperature, the wax has a thin syrupy consistency and can be applied smoothly. The wax should easily move back and forth in the cartridge.
- ❖ After applying a thin layer of wax, put the cartridge immediately back into the heater.

3 APPLY PRE-CARE

- ❖ To clean the skin, apply 2 pumps of SkinClean Foam with your hands until the foam is absorbed into the skin.

4 APPLY THE WAX

- ❖ Roll the cartridge onto the non-woven strip for the wax to start coming out of the cartridge.
- ❖ Apply the wax very thinly in the direction of hair growth. The Adore Strip Wax Roll-on is applied very sparingly - it looks almost transparent on the skin.
- ❖ After application, you have 60 seconds to remove the wax. After that, the wax becomes firm and doesn't stick to the waxing strip very well.

5 REMOVE THE WAX

- ❖ Place the waxing strip on the wax and gently massage over it with your hand (once up and down is enough) so that wax and strip can connect.
- ❖ If the customer has cold skin, simply rub the waxing strip a bit more intensely so the wax can stick to it.
- ❖ Quickly remove the waxing strip by pulling it against the direction of hair growth, along the well-tightened skin.

6 APPLY AFTER-CARE

- ❖ To remove wax residues and optimally nourish the skin, you can choose one of the following products:
 - For very dry skin and in winter we recommend AfterCare Oil.
 - On skin areas prone to folliculitis AfterCare Cream is used.
- ❖ For a cooling effect and to reduce redness, finish the treatment with SkinCool Gel.
