

Quick-Start Guide

With Next Generation Wax, you can remove hair as short as 1 mm on sensitive parts of the body such as face, underarms and intimate areas. All of the six scents of Next Generation Wax are used without strips and, besides being more pleasant to the skin, this innovative wax is well-known for not leaving any residue. For optimal results follow the correct steps of the PINK 1 mm Waxing Technique as described below. To see PINK wax in action visit: www.youtube.com/PINKCosmetics.

Sign up for a hands-on training at one of the PINK Waxing Academy Centers or learn from the comfort of your own home during an Online Waxing Training or with the PINK Waxing Manuals. Whatever option you choose, we are always by your side to support you every step of the way. To share tips and tricks with the PINK Waxing Experts join our English speaking Facebook Group: Depiladora's Secrets or the Dutch speaking Group: Depiladora's Secrets Nederland.

1 HEAT UP THE WAX

- ❖ Fill up the wax heater with wax pearls up to about one third or half full. That is approximately 150 - 300 ml. Heat the wax to just over 40 °C.
 - Depilatory Heater Professional Edition 450 ml resp. 800 ml: 20 minutes / level 4
 - Depilatory Heater Professional Edition 1000 ml: 15 minutes / level 2-2.5
- ❖ At the right temperature, the wax has a honey-like consistency, it stays on the spatula tip without dripping down and does not draw threads.
- ❖ Stir the wax regularly to make sure it is evenly tempered.

2 APPLY PRE-CARE

- ❖ Clean the skin with 2 pumps of SkinClean Lotion on a cotton pad.
- ❖ Put 2 sprays of PreCare Oil on a cotton pad and apply to the skin. Massage the oil into the skin until it glistens slightly. If there is too much oil, dab skin with cosmetic tissue.

3 APPLY THE WAX

- ❖ Apply wax with a wooden spatula using firm pressure while tightening the skin well and working consistently in one direction.
- ❖ Hold the spatula upright, like a pen. This creates a slightly thicker rim, which later serves as a "handle" for removing the wax.
- ❖ You can apply multiple patches at the same time. Size and shape vary depending on the area of application.

4 REMOVE THE WAX

- ❖ Wait about 10 seconds until the patches dry.
- ❖ The patches remain flexible on the skin for a very long time and do not break.
- ❖ Remove the patches along the skin and against the direction of hair growth (do not pull up).
- ❖ Immediately apply slight pressure with your hand.

5 APPLY AFTER-CARE

- ❖ Apply AfterCare Cream to disinfect and soothe the skin, boost hydration and help close the hair follicles.
- ❖ For a cooling effect and to reduce redness, the treatment is completed with the SkinCool Gel. Leave out the eye area.
